Final Rejection

The Status of Claims

Claims 1-2 and 8-18, and 20 are pending.

Claims 1 and 8-18, and 20 have been rejected.

Claims 3-7 have been canceled.

Claims 2 and 19 have been objected.

Claim Rejections-35 USC 112

1. Applicants' argument filed 6/30/2003 have been fully considered but they are not persuasive.

The previous rejection of Claim 1 has been withdrawn due to the modification in the amendment. However, there is still an issue in the claim in the amendment.

Regarding claim 1, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention.

See MPEP § 2173.05(d).

Double Patenting

The rejection of Claims 1 and 3-19 provisionally under the judicially created doctrine of double patenting over claims 18-19, 21-23, and 25-36 of copending Application No.

09662,035 has been withdrawn due to the modification made in the amendment.

Claim Rejections-35 USC 103

Rejection of Claims 1 and 8-18 and 20 under 35 U.S.C. 103(a) as being unpatentable over Elango et al (U.S. 4,981,995) in view of Chaudhari et al (U.S. 6,093,847) .

The rejection of Claims 1 and 8-18, and 20 under 35 U.S.C. 103(a) as being obvious over Elango et al (U.S. 4,981,995) in view of Chaudhari et al (U.S. 6,093,847) is maintained for reasons of the record in paper no. 11.

Response to Argument

2. The applicants argue the following issue:

1. the prior art references have used two different catalysts in comparison with the present invention;
2. the prior art references do not use the pressure as low as 50 psig;
3. none of the references have disclosed that the water is in the range of 1 to 6 %(v/v) of the total mixture;
4. the claimed process is involved in that the reaction vessel is flushed with an inert gas after the reaction process unlike the prior art .

Art Unit: 1625

The applicants' argument have been noted, but these arguments are not persuasive.

First, with regard to the first argument, the Examiner has noted applicants' argument. However, on the contrary to applicants' assertion, the prior art references do indicate the use of the palladium catalyst. Therefore, the prior art references are relevant to the claimed invention.

Second, regarding the second argument, the Examiner agrees.

Third, concerning the third argument, the Examiner has noted applicants' argument. However, the secondary Chaudhari et al reference does disclose that during the process of preparing ibuprofen water (4% v/v) (see col. 4, example 3) is employed in the presence of the palladium catalyst. Therefore, the prior art reference is relevant to the claimed invention.

Fourth, with respect to the fourth argument, the Examiner has noted applicants' argument. However, Elango et al does teach that step before the initiation of the reaction process. It has been held that merely reversing the order of steps in a multi-step process is not a patentable modification absent unexpected or unobvious results. EX parte Rubin, 128 U.S.P.Q. 440 (P.O.B.A. 1959).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
